Profile

Computer Science student at Misr International University specializing in Cybersecurity and Network Security. Passionate about Linux system administration, network security, secure software development, and machine learning. Experienced in building web applications, deploying Linux server infrastructures, and developing AI-based solutions. Certified by Cisco, IBM, AWS Academy, and Google, with strong problem-solving skills and a continuous desire to learn and apply modern security technologies.

EDUCATION

Bachelor of Science in Computer Science , <i>Misr International University</i>	01/2023 – 02/2027 Cairo, Egypt
• Major: Computer Science • Specialization: Cybersecurity • Current Level: Third Year • English Proficiency: B2	

CERTIFICATIONS

CC Certified in Cybersecurity Cisco Networking Academy	Ethical Hacker Cisco Networking Academy	Introduction to Cybersecurity Cisco Networking Academy
Foundations of Cybersecurity Google via Coursera	Cybersecurity Awareness: Cybersecurity Terminology LinkedIn Learning	Developing Your Emotional Intelligence LinkedIn Learning
OPSWAT Academy	CCNA: Introduction to Networks Cisco Networking Academy	IMB and cybersecurity IBM SkillsBuild
Working in a Digital World: Professional Skills IMB	Certified Kubernetes Security Specialist (CKS) UDEMY	Cloud Architecting AWS Academy Graduate
cloud computing fundamentals IBM SkillsBuild	Red Hat System Administration I (RH124 - RHA) - Ver. 10 Red Hat	Cybersecurity Fundamentals IBM SkillsBuild

SKILLS

Programming Languages

- Python
- C++
- Java
- SQL
- HTML
- CSS
- JavaScript
- PHP

Networking

- TCP/IP
- Routing & Switching
- VLANs
- Subnetting
- DNS
- DHCP
- SSH
- Network Troubleshooting

Machine Learning

- Data Preprocessing
- Feature Engineering
- Model Evaluation
- Classification Algorithms
- Scikit-learn

Development

- Object-Oriented Programming
- Data Structures
- Algorithms
- Git & GitHub
- REST APIs

Tools & Platforms

- Kali Linux
- Ubuntu
- Cisco Packet Tracer
- VMware
- Git
- GitHub
- Visual Studio Code
- Burp Suite
- Wireshark
- Nmap
- VirtualBox

Cybersecurity

- Network Security
- Vulnerability Assessment
- Web Application Security
- SIEM Fundamentals
- Security Monitoring
- Linux Security
- Secure Software Development
- Firewall Configuration
- Basic Penetration Testing

System Administration

- Ubuntu Server
- Linux Administration
- Bash Scripting
- Apache
- MariaDB
- User & Permission Management
- System Monitoring

Databases

- MySQL
- SQL
- Database Design

Soft Skills

- Problem Solving
- Analytical Thinking
- Team Collaboration
- Communication
- Time Management
- Adaptability
- Attention to Detail

PROJECTS

Customer Retention Prediction using Machine Learning,

Machine learning model for predicting customer churn using multiple classification algorithms

- Developed and evaluated multiple machine learning models to predict customer churn.
- Performed data preprocessing, feature engineering, and model evaluation.
- Compared Random Forest, Decision Tree, SVM, KNN, and Naive Bayes algorithms.
- Technologies: Python, Pandas, NumPy, Scikit-learn, Random Forest, SVM, KNN, Decision Tree, Naive Bayes.

Linux Server Infrastructure Deployment,

Ubuntu server deployment and administration for enterprise network services

- Installed and configured Ubuntu Server for web hosting and system administration.
- Configured Apache, MariaDB, SSH, networking, users, groups, and file permissions.
- Performed server monitoring, troubleshooting, and Linux system management.
- Technologies: Ubuntu Server, Linux, Bash, Apache, MariaDB, SSH, TCP/IP.

MIU QuickBit, University food ordering website with database integration.

- Developed a food ordering platform for university students.
- Designed user-friendly interfaces and integrated backend database functionality.
- Implemented authentication and order management features.
- Technologies: HTML5, CSS3, JavaScript, PHP, MySQL, Bootstrap.

Phone Store Management System, Object-oriented management system for phone store operations.

- Designed and implemented a complete phone store management application.
- Managed products, inventory, customers, and sales records.
- Applied object-oriented programming principles for maintainable software architecture.
- Technologies: C++, Object-Oriented Programming (OOP), File Handling, Data Structures.

Student Grades Management System, Data structures project for managing student academic records.

- Developed a student grading management system using efficient data structures.
- Implemented searching, sorting, and record management algorithms.
- Improved data organization and retrieval performance.
- Technologies: C++, Data Structures, Algorithms, File Handling.

PopStream, Movie streaming platform designed for children

- Developed a child-friendly movie streaming platform.
- Implemented movie browsing and content organization features.
- Focused on usability and responsive interface design.
- Technologies: HTML5, CSS3, JavaScript, PHP, MySQL.

16-bit Adder & Two's Complement Hardware Design,

Digital logic circuit implementation for arithmetic operations.

- Designed and implemented a 16-bit adder and two's complement circuit.
- Verified functionality through digital logic simulation and testing.
- Applied combinational logic design principles.
- Technologies: Digital Logic Design, Logic Gates, Hardware Design.

Languages

- Arabic — Native
- English — B2 (Upper-Intermediate)
